

### ASSIGNMENT NO:7

Write a PL/SQL block of code using parameterized Cursor that will merge the data available in the newly created table N\_Roll Call with the data available in the table O\_RollCall. If the data in the first table already exist in the second table then that data should be skipped.

```
gescoe@gescoe-OptiPlex-3010:~$ mysql -h 192.168.2.232 -u TEB41 -p
```

Enter password:

Welcome to the MariaDB monitor. Commands end with ; or \g.
